DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Invention I (claims 48 and 49) in the reply filed on August 10, 2009 is acknowledged. The traversal is on the ground(s) that there is no serious search and examination burden on the examiner. This is not found persuasive because the two inventions have different scopes as pointed out by the Attorney Arguments on March 12, 2009. Inventions having different scopes require different and/or additional search regardless of the classification. There are thousands of different inventions under the same classification. The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 112

- 2. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 3. Claim 50 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.
- 4. Claim 50 recites "a computer readable medium." The instant application does not disclose a computer readable medium. Therefore, this limitation is considered New Matter.

Art Unit: 3696

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- 6. Claim 50 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 7. Applicant is attempting to claim both a method and a system. A single claim that overlaps *two* different statutory classes is indefinite. For examination purposes the Examiner is interpreting the claim to be directed to a system.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

- 2. Claim 50 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
- 3. 35 USC 101 requires that in order to be patentable the invention must be a "new and useful process, machine, manufacture, *or* composition of matter, *or* any new and useful improvement thereof" (emphasis added). Applicant's claims mentioned above are intended to embrace or overlap *two* different statutory classes of invention as set forth in 35 USC 101. The

claims begin by discussing a system (ex. preamble of claim 50), the body of the claim discusses the specifics a method, and subsequently the claim then deals with the specifics of a method (the steps) executed by the medical log (see above rejection of claims under 35 USC 112, second paragraph, for specific details regarding this issue). "A claim of this type is precluded by the express language of 35 USC 101 which is drafted so as to set forth the statutory classes of invention in the alternative only", Ex parte Lyell (17 USPQ2d 1548).

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 9. Claim 50 is rejected under 35 U.S.C. 102(b) as being anticipated by Golden, U.S. Patent No. 5,933,815 (reference A on the attached PTO-892).
- 10. As per claim 50, Golden teaches a financial planning system for calculating income streams for a husband and a wife, comprising: one or more computer systems (see column 5, lines 38-40); and a financial planning application embodied on a computer readable medium (see column 5, lines 40-52) and operable, when executed by the one or more computer systems, to: receive information about the husband, including the husband's age or birthdate; receive information about the wife, including the wife's age or birthdate; calculate a projected retirement income for the husband and the wife in a bridge scenario, the projected retirement income in the bridge scenario including an estimate of yearly inflation-adjusted after-tax income from: a bridge annuity for the husband

Art Unit: 3696

beginning at an expected retirement age for the husband ending at a deferred Social Security age for

the husband; deferred Social Security for the husband beginning at the deferred Social Security age

for the husband; a bridge annuity for the wife beginning at an expected retirement age for the wife

and ending at a deferred Social Security age for the wife; and deferred Social Security for the wife

beginning at the deferred Social Security age for the wife; calculate a projected retirement income for

the husband and the wife using an alternative funding approach; compare the calculated projected

retirement income for the husband and the wife in the bridge scenario to the projected retirement

income for the husband and the wife using the alternative funding approach.

11. The Examiner notes: The claimed system encompasses two components, a computer

system and a computer readable medium. The system of Golden is capable of performing the

same functions as claimed.

Response to Arguments

4. Applicant's arguments with respect to claim 50 have been considered but are moot in

view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this

Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3696

6. A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
